

Special Issue

Water Governance and Sustainable Water Resources Management

Message from the Guest Editors

The OECD defines Water Governance as a set of political, institutional and administrative principles and practices, as well as formal and non-formal processes, in which stakeholders can articulate their expectations and needs in the field of water management. Such knowledge allows for decision-making and the implementation of actions depending on the needs of stakeholders (OECD 2015). In other words, governance refers to the role of institutions and the relationships between organizations and social groups involved in decision-making processes regarding water, both in different sectors and between urban, rural and international areas. Water management should be efficient, effective and inspire confidence within society. Sustainable Water Management (SWM) refers to using water in a way that meets current ecological, social and economic needs without compromising the possibility of meeting these needs in the future [...] For further reading, please follow the link to the special issue website at:

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
