# Resettlement Resilience: Addressing Water Footprint, Climate Change, and Environmental Sustainability

## Message from the Guest Editors

This Special Issue aims to explore the intersecting dynamics of water footprints, climate change, resettlement, and environmental sustainability, with a focus on understanding and addressing the complexities of resettlement processes in the context of changing hydrological conditions. This Special Issue will provide a platform for multidisciplinary research and dialogue, encompassing topics such as hydrology, climate science, social resilience, environmental justice, policy studies, and community-based adaptation. It will examine the interactions between water resources. climate change-induced displacement, resettlement practices, and strategies for enhancing environmental sustainability and resilience in resettled communities. This Special Issue will contribute to advancing knowledge, fostering dialogue, and promoting action on the complex challenges of climate-induced resettlement, water sustainability, and environmental resilience. We invite contributions from researchers, scholars, practitioners, policymakers, and activists working at the intersection of water resources, climate change, resettlement, and environmental sustainability.

## **About the Journal**

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

#### Editor-in-Chief

### Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse. France

#### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.
