

## Special Issue

# Research on Water Resources Utilization Efficiency and Economic Development

### Message from the Guest Editors

To achieve the sustainable development of water resources, we must begin with a rational exploitation of water resources. Consequently, it is necessary to develop a rational and appropriate measurement and assessment index system of regional economic coordination to evaluate water-resource utilization efficiency and economic development. In this context, researchers are invited to contribute to the Special Issue entitled “Research on Water Resources Utilization Efficiency and Economic Development”. Both original field and experimental research papers, review papers, as well as case studies, are invited for submission in the context of water-resource utilization efficiency and economic development. Keywords:

- water-resource management
- economic development
- virtual water
- water footprint
- aquatic ecosystem services
- carbon neutrality and marine resource management

---

### Guest Editors

Dr. Sufyan Ullah Khan

Department of Economics and Finance, UIS Business School,  
University of Stavanger, Stavanger, Norway

Dr. Yao Zhang

Management School, Hainan University, Haikou, China

---

### Deadline for manuscript submissions

closed (27 May 2023)

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
