

## Special Issue

# Current Strategies to Remediate Emerging Environmental Toxicants

### Message from the Guest Editors

It is our pleasure to work on a Special Issue focusing on strategies to tackle emerging pollutants in the environment. We invite researchers focusing on environmental sciences, particularly working on trending toxicants, to communicate their work to this Special Issue. Authors with expertise in the areas listed below are highly encouraged to consider communicating their work. **Keywords:** Bioremediation; Water Chemistry; Forever chemicals; Electrochemical systems; Emerging toxicants; PFAS; Defluorination; Microbial degradation; Electrochemical remediation.

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
