Socio-Economics of Water Resources Management

Message from the Guest Editors

Water is one of the most important resources for supporting economic and social development. Irrational development and the utilization of water resources has led to a series of problems, such as water shortage, water environmental pollution, water ecological damage, and frequent water disasters, which in turn restrict economic and social development. How to manage and make good use of water resources is a hot scientific problem at present. Different from hydrology research, the essence of water resources science is to rationally allocate water resource attributes from the perspective of human beings to meet the needs of economic and social development. Therefore, it is necessary to deeply study the theories and methods of water resources management from the perspective of social economics. About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzelle Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPLus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
