

## Special Issue

# Advances in Food and Textile Industry Wastewater Treatment

### Message from the Guest Editors

This Special Issue focuses on the use of sustainable advanced technologies for food and textile industries' wastewater treatment and their future prospects.

Keywords:

- food wastewater
- textile wastewater
- sustainability
- circular economy
- remediation technologies

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
