

Special Issue

Ice, Snow and Glaciers and the Water Cycle

Message from the Guest Editors

We invite case studies from around the world to be submitted to this Special Issue “Ice, Snow and Glaciers and the Water Cycle” These case studies will contribute to our understanding of the complex dynamics of trace metal behavior in glacial environments, shedding light on the global significance of this issue. Keywords

- toxic heavy metal
- anthropogenic disturbance
- migration and transformation
- transport dynamic
- mechanism
- meltwater
- glacier
- eco-environmental effect
- Tibetan Plateau

Guest Editors

Dr. Ting Wei

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
