

Special Issue

Advances in Isotope Hydrology for Climate and Water Resources Management

Message from the Guest Editors

In this Special Issue, we encourage submissions describing isotope applications to explore the role of different hydrological processes and their impact on a better understanding and management of groundwater resources. Keywords

- isotopes
- water management
- groundwater
- hydrological processes
- aquifer recharge
- groundwater hydrodynamics
- water availability
- equipped basins
- water budget
- climate change

Guest Editors

Dr. Davide Fronzi

Dr. Alberto Tazioli

Dr. Francesco Ronchetti

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
