

Special Issue

Hydrochemical Characteristics of Geothermal Water

Message from the Guest Editor

The Special Issue of Water focusing on the "Hydrochemical Characteristics of Geothermal Water" will publish high-quality research on the application of fluid geochemical techniques in geothermal applications.

We welcome all colleagues to publish original research articles in this Special Issue. Areas of research for this Special Issue include (but are not limited to) the following:

- Application of isotope technology in geothermal exploration;
- Water-rock interaction process and mechanism;
- Application of hydrogeochemistry in geothermal exploration;
- Application of gas geochemistry in geothermal exploration;
- Application of rock geochemistry in geothermal exploration;
- Geothermometer for geothermal reservoir temperatures estimation;
- Geochemical characteristics of regional geothermal fluids
- Sustainable Geothermal Development and Management.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
