

## Special Issue

# Sustainable Remediation of Pesticides in Contaminated Water and Sites

### Message from the Guest Editors

Pesticides and emerging contaminants are a major global environmental challenge, affecting water and soil quality, and posing a threat to ecosystems and human health. The research on environmental behavior, effective remediation techniques, and sustainable management strategies for pesticides and other pollutants in sites and water environments has important scientific significance and practical application prospects. This Special Issue aims to explore the environmental behavior, risk assessment, and innovative physical, chemical, and biological remediation technologies of pesticides and the other emerging contaminants, as well as their applications in real-world scenarios, supporting the sustainability and interdisciplinary research of these technologies. We invite experts in relevant fields to submit high-quality research papers and review articles, and we look forward to your active participation and support.

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
