

Special Issue

New Challenges in Interdisciplinary Water Resources Management

Message from the Guest Editors

This Special Issue, entitled “New Challenges in Interdisciplinary Water Resources Management”, will focus on the latest research and developments in the field of water resources management. This Special Issue will explore the challenges in water resources management in the 21st century and beyond, including climate change, population growth, urbanization and water pollution. This Special Issue will also discuss the latest interdisciplinary approaches to water resources management, such as integrated water resources management (IWRM), water security, nexus and water-climate security. The purpose of the Special Issue is to provide a forum for researchers and practitioners to share their latest research and insights on the challenges in water resources management. This Special Issue will also provide a platform for discussion and debate on the latest trends in water resources management. [...] For further reading, please follow the link to the Special Issue Website at: https://www.mdpi.com/journal/water/special_issues/810381Y61E

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
