

## Special Issue

# Groundwater for Health and Well-Being

### Message from the Guest Editor

Some groundwaters are used in establishments called Health Resort Medicine not only for therapeutic purposes—called Balneotherapy, which is included in the catalog of services provided by the National Health Systems—but also for leisure and wellness, and they support a sector of great economic and social importance, such as thermalism. Considering these factors, it is necessary to know and guarantee water quality by applying advanced technologies that allow us to protect it from the anthropic ecosystem and the potential impacts of climate change through water monitoring and control, real-time data digitization, the prediction of potential contaminants that could modify the fundamental parameters of thermal waters (artificial intelligence), the characteristics of their hydrobiomes, and the improvement in the energy efficiency of thermal facilities. This Special Issue aims to compile research articles and reviews dedicated to hydrogeology, physics, chemistry, medicine, pharmacy, biology, computer science, etc., as well as public authorities and economic stakeholders related to this sector.

### Guest Editor

Prof. Dr. Francisco Maraver Eyzaguirre

Professional School of Medical Hydrology, Complutense University of Madrid, 28040 Madrid, Spain

### Deadline for manuscript submissions

10 May 2026

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
