

Special Issue

Advances in Sprinkler Irrigation Systems and Water Saving Volume II

Message from the Guest Editors

The purpose of this Special Issue of *Water* is to collect the latest research covering advances in sprinkler irrigation systems and water saving, specifically including, but not limited to, the following aspects:

- Evaluation of sprinkler irrigation performance;
- Variable rate irrigation;
- Smart irrigation;
- Low-pressure sprinkler irrigation;
- Fertilization;
- Parameter optimization;
- New technology and equipment.

Guest Editors

Prof. Dr. Haijun Yan

College of Water Resources and Civil Engineering, China Agricultural University, Beijing 100083, China

Prof. Dr. Xingye Zhu

Research Center of Fluid Machinery Engineering and Technology, Jiangsu University, Zhenjiang, China

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR

Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
