

Special Issue

Coastal Processes and Climate Change

Message from the Guest Editors

Special Issue Information: Topics of particular interest include, but are not limited to:

- Study of environmental parameters regarding coastal erosion, accretion, inundation, and stability.
- Provide new innovations regarding data collections, analytical methods, and modelling techniques of coastal processes.
- Environmental impact assessment of coastal engineering structure in terms of coastal stability and sediment transport.
- Study of coastal pollution problems with focusing on pollutant transport by waves and littoral currents.
- Remote sensing using different platforms (passive and active) of shoreline dynamics and deterioration of coastal ecosystems.
- Geospatial analysis of coastal vulnerability to inundation and subsidence, particularly at low-lying coastal landscapes.

Guest Editors

Prof. Dr. Mohamed Hereher

1. Department of Environmental Sciences, Faculty of Science, Damietta University, New Damietta, Egypt

2. Geography Department, College of Arts and Social Sciences, Sultan Qaboos University, Muscat, Oman

Prof. Dr. Ayad M. Fadhil Al-Quraishi

Petroleum and Mining Engineering Department, Faculty of Engineering, Tishk International University, Erbil 44001, Iraq

Deadline for manuscript submissions

closed (28 February 2023)

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
