

Special Issue

Biodiversity Conservation of Aquatic Organisms, Especially Aquatic Plants, and Aquatic Ecosystem Health

Message from the Guest Editors

The Yangtze River Basin, as one of the high biodiversity regions in the world, harbors a vast array of aquatic plants that play critical roles in maintaining the health of aquatic ecosystems. This Special Issue aims to explore the complex interactions between aquatic plants and the broader ecosystem, emphasizing both the conservation of biodiversity and the sustainable use of plant resources. We also aim to focus on the following key areas: aquatic plants and aquatic ecosystem health, diversity and conservation of aquatic plants, conservation and utilization of aquatic plant resources, invasive aquatic plants and ecological security, etc.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
