

Special Issue

Water Use/Footprint for Agricultural Products during Production, Trade and Consumption Processes

Message from the Guest Editors

This special issue addresses the discussions for water use of agricultural products during different processes, such as production, consumption, trade or others, focus on a particular kind of crop is also welcomed, and different methods including water footprint of but not limited to water-use efficiency, water dependencies, water stress and security, environmentally sustainable water use, water saving and interaction between surface water and underground water, in both natural and artificial systems.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
