

## Special Issue

# Decision-Making Theory and Methodology for Water, Energy and Food Security, 3rd Edition

### Message from the Guest Editors

In recent years, the water-energy-food nexus is becoming an increasingly significant and active area of research in economic and management science. Regarding safety, research into water, energy, and food is another important issue, which can be considered multi-criteria decision-making problems. However, there is a lack of studies which consider these concerns from this angle. Theories of decision-making are routinely based on the notion that decision-makers choose alternatives which align with their underlying preferences and, hence, that their preferences can be inferred from their choices. The aim of this Special Issue is to develop various decision-making theories and methodologies for water, energy and food, including evaluation of water supply, waste water management, energy, food risk management, safety management, etc.

---

### Guest Editors

Prof. Dr. Yejun Xu

College of Management and Economics, Tianjin University, Tianjin 300072, China

Dr. Carlos Llopis-Albert

Institute of Mechanical and Biomechanical Engineering, Universitat Politècnica de València, Camino de Vera s/n, 46022 Valencia, Spain

---

### Deadline for manuscript submissions

21 December 2026

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
