Climate Change and Anthropogenic Impact on Coastal Environments

Message from the Guest Editors

Coastal environments, including lagoons, bays, estuaries, and wetlands, represent valuable resources in terms of both socioeconomic interest and cultural-natural heritage. However, these areas placed at the border between land and sea are inevitably at the forefront against the threat of global climate change and their complex dynamics and resilience strategies have only been partially understood so far. Nevertheless, the high sensitivity of coastal environments to even subtle changes in climate conditions and anthropogenic activities, operating at various timescales (from millennial to sub-centennial), makes them exceptional archives where critical information about both present and past processes are stored. [...] For further reading, please follow the link to the Special Issue Website at: https://www.mdpi.com/journal/water/special_issues/Coastal_Environments

Guest Editors

Dr. Monica Bini

Earth Sciences Department, University of Pisa, Via S. Maria 53, 56126 Pisa, Italy

Dr. Veronica Rossi

Department of Biological, Geological and Environmental Sciences, Alma Mater Studiorum Università di Bologna, Bologna, Italy

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
