# **Special Issue**

# The Application of Electrochemical Methods in Water Treatment, 2nd Edition

## Message from the Guest Editors

"The Application of Electrochemical Methods in Water Treatment" welcomes the research fields covered by the following areas:

- Bioelectrochemistry;
- Combining electrochemistry with other technologies;
- Computational and theoretical electrochemistry;
- Electrochemical materials science;
- Electrochemical methods in carbon sequestration and conversion:
- Electrochemical sensors in water treatment:
- Fundamental electrochemistry;
- Mechanisms of contaminants transformation;
- Pilot- and full-scale application of electrochemical technology.

The editors would like to draw particular attention to the quality and the scientific content of submissions. Papers must be presented in a way that is accessible to the readers. The presentation and discussion must be at a level that meets the global status of *Water*.

## **About the Journal**

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

#### Editor-in-Chief

#### Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse. France

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
