

## Special Issue

# Emerging Collaborative Inter-Continental Research in Water Resources

### Message from the Guest Editors

There is a rapidly growing need for evidence of the efficacy of water management interventions to safeguard the status of water resources at both a local and basinscale. The Special Issue has an emphasis on developing tools to predict impacts of interventions both in terms of hydrology and water quality and more widely use other environmental and social indicators. The hydrology, chemistry, and biology of urban and agricultural systems are covered, as are in-river processes. For this Special Issue, the focus is on bringing together research across continents involving developing nations; it will also foster emerging and upcoming research being driven by early career researchers. The first authors within 10 years of the award of their PhD (or latest academic qualification) are eligible.

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
