

## Special Issue

# Recent Advances in Freshwater Fish Ecology and Fisheries Management

### Message from the Guest Editors

This Special Issue invites fundamental and applied research studies that follow on from recent developments in both Freshwater Fish Ecology and Fisheries Management. **Keywords**

- freshwater ecosystems;
- recreational fisheries;
- environmental drivers;
- freshwater fish assemblages;
- ecosystem services;
- resource sustainability.

---

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
