

## Special Issue

# Implementation of Biodiversity and Ecosystem Services in Marine Ecosystem Management, 3rd Edition

### Message from the Guest Editor

At a local and national scale, relatively limited information still exists on the status of many ecosystem services, with the lowest level of information coming from marine ecosystems.

New methodological approaches are necessary to fill in the existing knowledge gap between land and marine ecosystems. The perspective and/or the maintenance of human wellbeing necessarily asks for a bigger contribution (in terms of direct resources and indirect services) of the marine environment, which represents 71% of the Earth surface.

This Special Issue aims to showcase classical and innovative studies of the submarine world (e.g., the mesophotic–aphotic or the open sea), mostly parts from which new information (in terms of carbon sequestration, tourist attraction, fishery management, and new food sources) and biological products can be taken, other than the consciousness of where the most urban litter goes.

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
