

Special Issue

Effect of Human Activities on Marine Ecosystems

Message from the Guest Editors

This Special Issue specifically focuses on the effect of human activities on marine ecosystems as well as the preservation and restoration of marine ecosystems. The primary aim of this Special Issue is to exchange insights, innovations, and success stories among researchers, practitioners, and policymakers concerning the protection and rehabilitation of marine ecosystems. This Special Issue covers a broad spectrum of topics, including, but not limited to, the following:

- Effect of human activities on marine ecosystems;
- Technological advancements in monitoring marine biodiversity;
- Identifying the drivers of degradation and loss of marine biodiversity;
- Assessing and monitoring marine ecosystem health;
- Development of conservation and management strategies;
- Design, effectiveness, and management of marine protected areas;
- The restoration of degraded marine ecosystems.

Keywords: marine ecosystems; human activities; biodiversity; pollution; overfishing; protection; restoration; marine protected areas; management strategies

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzelle Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPLus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
