# Assessment of Hydrological and Hydro-Meteorological Extreme Events

### Message from the Guest Editor

Hydrological and hydro-meteorological extremes have recently gained greater relevance to the general public and policy makers, partly as a consequence of the large number of weather-driven hazardous events and associated human, environmental and property losses that have occurred worldwide in the last decade. In 2019, natural catastrophic events associated with hydrological and hydro-meteorological extremes included cyclone Idai in Mozambique and neighbouring countries, [...] Understanding how the frequency and severity of hydrological and hydro-meteorological events are changing at both the global and regional scales and the reasons behind this variability is vital for [...] For this Special Issue of *Water*, we welcome authors to submit research on, but not strictly limited to, the following topics:

- Extreme hydrological and/or hydro-meteorological events: case studies or climatological analysis;
- [...]

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
