

Special Issue

Persistent Toxic Substances (PTs) Pollution: Current Status, Distribution and Evolution Trend in Waters

Message from the Guest Editors

This Special Issue welcomes the submission of original research and review articles on environmental processes and impacts associated with aquatic PTs on a global or regional scale that contribute to increasing awareness of their environmental fate, potential, and impact on aquatic ecosystem and human health. Relevant topics include but are not limited to the following:

- research of sources and transport of PTs in water;
- study on the ecotoxicology of PTs in water;
- interaction between/among PTs and the effects of mixture on aquatic organisms and human being;
- development of the technologies on PTs detection and measurement.

Guest Editors

Prof. Dr. Chengkai Qu

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
