

Special Issue

The Safety Operations and Intelligent Control of Water Network Engineering Systems

Message from the Guest Editors

This Special Issue aims to address these challenges by focusing on the safety operations and intelligent control of water network engineering systems. We invite researchers, practitioners, and policymakers to submit their original research papers, reviews, and case studies. Suitable topics include, but are not limited to, the following: (1) Water network safety evaluation methods; (2) Intelligent control systems for water networks; (3) Risk assessment and management in water engineering; (4) Integration of IoT and AI in water safety operations; (5) Reliability analysis of water infrastructure; (6) Seismic impact and mitigation strategies for water networks; (7) Dynamic and static analyses of water engineering structures; (8) Safety monitoring and real-time data analysis; (9) Case studies on water network safety and control; (10) Emergency response planning and disaster management in water networks; (11) Sustainability and environmental impact assessments of water networks; (12) Cybersecurity in water network operations; (13) Policy and regulatory frameworks for water network safety and control.

Guest Editors

Dr. Yantao Zhu
Dr. Rui Pang
Dr. Bingham Xue

Deadline for manuscript submissions

30 June 2026

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
