

Special Issue

Mine and Water

Message from the Guest Editors

This Special Issue, entitled “Mine and Water”, is sponsored by *Water* magazine and the Xi'an Geological Survey Center of China Geological Survey Bureau. “Mine and Water” aims to promote the exchange of scientific and technological achievements at home and abroad, develop innovative achievements in the field of hydraulic engineering and environmental protection, train and discover geological talents, and to play a greater role in presenting geological work and economic and social development. This Special Issue focuses on the innovative frontier research results of mine environmental science. It covers the research results of hydrogeology, environmental geology, ecological geology and health geology in relation to water in the mining area. This is performed via an analysis on water pollution, high background water problems, migration and transformation, monitoring, prevention and control, etc. For further reading, please follow the link to the special issue website at:

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
