Novel Insights on Wastewater Treatment Processes for Sustainable Removal of Emerging Contaminants

Message from the Guest Editors

We would like to invite researchers working on **emerging contaminants** to share cutting-edge **advances in wastewater treatments** that may contribute to the **sustainability and safety of wastewater treatment and reuse**, and to present developing **methodologies to assess ecosystem conservation and restoration**.

- emerging contaminants
- wastewater characterization
- wastewater reuse
- circular economy
- sustainable strategies
- advanced wastewater treatment
- ecotoxicity
- life cycle assessment

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
