

Special Issue

Saline Water and Brine Geochemistry

Message from the Guest Editors

The themes of this Special Issue include, and are not limited to, salt lakes, brackish water lakes, underground saline water, basinal deep brine, oilfield water, resources of brine, etc. Keywords

- salt lake
- saline water
- brine
- oilfield water
- aquatic geochemistry
- brine K and Li resources

Guest Editors

Prof. Dr. Chenglin Liu

Dr. Hua Zhang

Prof. Dr. Qishun Fan

Deadline for manuscript submissions

closed (20 September 2024)

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
