Special Issue

Marine Economic Development and Conservation

Message from the Guest Editors

As an important carrier of modern economic development and social activities, the ocean is not only a natural basis for ecologically sound and sustainable development, but also a new growth pole for economic breakthroughs and innovations and a key component of the overall composition of social development, but at the same time, it may also turn into a bottleneck and a hidden danger that restricts socioeconomic development. As the strategic position of the ocean continues to be highlighted, issues such as high-quality development of the marine economy, resource accounting and management, efficiency and management, ecological compensation and security, marine bearing capacity measurement, and the construction of monitoring and early warning and management systems have become increasingly important. The recent rapid development and application of the digital economy, artificial intelligence, big data, and cloud computing technologies provide new opportunities for the development and protection of marine economy.

Guest Editors

Prof. Dr. Shuhong Wang

Marine Economics and Management, Shandong University of Finance and Economics, Jinan, China

Prof. Dr. Sheng Xu

School of Economcis, Ocean University of China, Qingdao, China

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse. France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
