

Special Issue

Marine Environmental Research

Message from the Guest Editor

The marine environment includes the waters of seas and estuaries, the seabed and its subsoils, and all marine wildlife and its sea and coastal habitats. Marine ecosystems perform a number of key environmental functions. Additionally, the marine environment is a vital resource for life on Earth. The story of oceans is the story of life. Thus, the ultimate aim is to keep our oceans and seas safe, clean, healthy, and productive. In the ocean, a range of multi-scale oscillations occur, including ocean circulations, eddies, tides, surges, and waves. They play an important role in many aspects, e.g., climate regulation, ocean energy, fishery resources, navigation safety, and disaster prevention. [...] The aim and scope of this Special Issue is to invite papers with the main focus on marine environment research, including the clarification of interesting physical/chemical/biological phenomena, processes, and mechanisms as well as recent developments/applications of remote sensing techniques, [...] For further reading, please follow the link to the Special Issue Website at:

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
