

Special Issue

Leading Edge Technology on Water-Included Landslides

Message from the Guest Editors

This Special Issue welcomes the submission of manuscripts that focus on the application of advanced technology in landslides, covering numerical methods, experimental investigations, and various emerging topics. We welcome high-quality contributions that enhance our understanding of landslides and mitigation efforts through theory, simulations, and experimental work. Additionally, we welcome the submission of review articles that provide an overview of the current state of research in this field. Keywords

- landslide
- slope stability
- geohazard
- numerical modeling
- advanced techniques
- risk assessment
- mitigation strategies

Guest Editors

Dr. Chih-Yu Liu

Department of Civil Engineering, National Central University, Taoyuan, Taiwan

Prof. Dr. Cheng-Yu Ku

Department of Harbor and River Engineering, National Taiwan Ocean University, Keelung, Taiwan

Deadline for manuscript submissions

closed (25 November 2024)

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
