

## Special Issue

# Coastal and Marine Governance and Protection, 2nd Edition

### Message from the Guest Editors

We welcome original research papers, reviews, and case studies that explore novel approaches and evidence-based solutions. The scope of this Special Issue includes, but is not limited to, the following topics:

- **Comparative Legal and Policy Frameworks:** Analyses of coastal and marine legislation, including critical reviews, identification of best practices, and cross-national comparisons.
- **Innovative Risk Governance:** Novel models and methods for multi-hazard risk assessment, management, and governance in coastal and marine environments.
- **Citizen Science and Community Training:** Methodologies and empirical experiences involving citizen science, capacity building, and the training of coastal communities in environmental monitoring and stewardship.
- **Sustainable Blue Tourism:** Critical assessments and innovative models for a sustainable and resilient blue tourism industry that balances economic benefits with ecological and social integrity

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
