Wastewater Treatments: From Waste to Resource

Message from the Guest Editor

The paradigm shift from a linear to a circular economic model has changed the view of wastewater as a valuable resource instead of a problem in the treatment of wastewater. This Special Issue, “Wastewater Treatments: From Waste to Resource”, is devoted to all aspects of wastewater treatment processes designed with the circular economy in mind. The Special Issue invites publications including both original works and reviews in the field of wastewater treatment processes, emphasizing the recovery of valuable resources, such as reusable water, energy, biosolids, nutrients, metals, etc., from waste streams, and promoting the reuse, recycling and recovery of water and valuable resources. For further reading, please follow the link to the Special Issue Website at:

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
