

Special Issue

The Occurrence and Removal of Persistent Compounds (Pharmaceuticals) in the Water Cycle and the Assessment of the Environmental Risk

Message from the Guest Editors

Research papers, review articles, case studies presentation, and short communications dealing with the occurrence and removal efficiencies of such persistent compounds in wastewater and water and environmental risk assessment are welcome! Some keywords for your convenience are listed here.

- persistent compounds
- pharmaceuticals
- occurrence in water environment
- removal efficiencies during treatment
- environmental risk assessment
- case studies
- priority compounds

Guest Editors

Dr. Paola Verlicchi

Prof. Dr. Mustafa Al Aukidy

Prof. Dr. Manuela Antonelli

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
