

## Special Issue

# Advance in Removal of Organic Compounds from Water Environments and Sediments

### Message from the Guest Editor

our research team is pleased to announce this Special Issue, which is devoted to the study of the suspended matter distribution and composition. This work is a part of the research program “Marine Ecosystems of the Siberian Arctic”, which was launched by the P.P. Shirshov Institute of Oceanology of the Russian Academy of Sciences in 2007 to study the natural systems of the Kara, Laptev and East Siberian Seas. For this reason, a unified methodological approach was applied to explore the ecosystem of the Arctic shelf zone and its current variability. As suspended matter originates from numerous sources and can absorb various contaminants, studying its underlying mechanisms is important for a comprehensive understanding of sedimentation processes and contaminant transport in marine ecosystems, [...]. For further reading, please follow the link to the Special Issue Website at: [https://www.mdpi.com/journal/water/special\\_issues/Removal\\_Compounds\\_Water\\_Sediments](https://www.mdpi.com/journal/water/special_issues/Removal_Compounds_Water_Sediments)

### Guest Editor

Prof. Dr. Inna A. Nemirovskaya

P.P. Shirshov Institute of Oceanology, Russian Academy of Sciences, Moscow, Russia

### Deadline for manuscript submissions

closed (20 December 2022)

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
