

Special Issue

Review Papers of Water, Agriculture and Aquaculture

Message from the Guest Editor

This Special Issue, Review Papers of Water, Agriculture and Aquaculture, is designed to publish well written, high-quality reviews that critically examine all aspects of the relationship between water and food, especially poorly understood and under-appreciated aspects of the subject. It will encompass both food production on land (agriculture) and food production in water (aquaculture). Researchers are most welcome to contribute comprehensive review papers for consideration and publication in this Special Issue.

Guest Editor

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
