

## Special Issue

# The Relationship between Ships and Marine Environment

### Message from the Guest Editor

This Special Issue is dedicated to bringing current knowledge to provide a comprehensive, in-depth analysis of shipping impacts. We welcome both original papers and reviews that provide the community with the most recent advancements in all aspects of shipping impact on the marine environment.

- oil spills
- ballast water
- noise pollution
- ship strike
- waste dumping
- antifouling system
- greenhouse gas
- non-indigenous species
- vessel exhaust

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
