

Special Issue

Sustainable Approaches in Water Treatment Practices, Presenting Minimum Environmental Impact

Message from the Guest Editors

This Special Issue will give particular attention to studies on treatment methods related to water management during mineral processing and to groundwater polluted by mining activities.

Keywords

- Water treatment
- Water quality parameters
- Pollutants removal
- Sustainable technologies
- Best practices
- Drinking water
- Wastewater
- Environmental impact
- Life cycle analysis

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
