

Special Issue

Urban Water Economics

Message from the Guest Editors

This **Special Issue** aims to offer an overview of recent developments in urban water resources management from an economic perspective. Both methodological and empirical contributions are welcome as well as relevant literature reviews. Papers focused on following topics are welcomed:

- Water demand estimation and forecasting;
- Analysis and design of water pricing policies;
- Incentives for R&D investments;
- Implementation of water-saving measures;
- Analysis of the effectiveness of awareness campaigns;
- Analysis of water end uses;
- Socioeconomic aspects of water use;
- Water infrastructure assessment;
- Development and use of alternative water resources; and
- Improvements in water governance.

Guest Editors

Prof. Dr. Ramón Barberán

Department of Applied Economics, Faculty of Economics and Business Studies, University of Zaragoza, Zaragoza, Spain

Dr. Pilar Gracia-De-Rentería

Department of Agrifood and Natural Resource Economics, Agrifood Research and Technology Centre of Aragon (CITA), Zaragoza, Spain

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST
