

## Special Issue

# Waterborne Pathogens and Their Surrogates: Advances in Surveillance and Risk Assessment

### Message from the Guest Editors

This Special Issue, entitled “Waterborne Pathogens and Their Surrogates: Advances in Surveillance and Risk Assessment”, focuses on methodological improvements in the detection of indicators of potentially pathogenic organisms, including biological and environmental surrogates, and advances in the modelling of human health risks associated with exposure to either the surrogates or the pathogens themselves. Contributions may include, but are not limited to, the following:

- Improvements in the detection and modelling of sources of microbial contributions to aquatic environments;
- Epidemiological modelling of exposure probabilities and disease risk from waterborne pathogens;
- Progress in the use of non-biological indicators of microbial water quality and disease risk.

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
