

Special Issue

Marine Ecology and Fisheries Biology Management

Message from the Guest Editors

Our oceans have been confronted with various issues such as global warming, ocean acidification, and climate changes, resulting in a multitude of threats that endanger the ocean ecosystems and their resources. Current interest in marine ecology and fisheries management stems from concerns about over-exploitation and the apparent need for better resource management under the changed climate conditions. This special issue would focus on the study of marine environments, resilience, and management of their living resources from the perspective of current environmental challenges and threats. This issue will also cover the biological, ecological and fisheries studies with emphasizing conservation and sustainable utilization of these ocean resources.

Guest Editors

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
