

Special Issue

Advances in Coastal Morphodynamics

Message from the Guest Editors

The inspiration for this Special Issue on advances in coastal morphodynamics was the **Coastal Dynamics 2021** Conference, held in Delft from 29 June to 2 July 2021. The conference theme was “Shaping the Future of our Coasts”, and scientists and practitioners from all over the world were invited to contribute their insights and research results on how nature and humans are shaping our coasts, now and in the future. Participants were invited to submit their manuscripts for possible publication in two Special Issues, this one on advances in coastal morphodynamics and another on advances in coastal hydrodynamics. Their submissions will be pre-screened by the conference’s local organizing committee. However, we expect that there is a wider interest in submitting manuscripts on these topics, and the issue editors very much welcome submissions from authors who did not participate in the conference.

Guest Editors

Dr. Ad J.H.M. Reniers

Department of Hydraulic Engineering, Faculty of Civil Engineering and Geosciences, Delft University of Technology, Delft, The Netherlands

Dr. Ap van Dongeren

Deltares and IHE, Delft, The Netherlands

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
