

Special Issue

China Water Forum 2022

Message from the Guest Editors

Focusing on discussing China's water issues, we have carried out a series of academic exchanges for a long time. The well known "China Water Forum", launched in 2003 and held annually, focuses on discussing solutions to China's water issues. "Water Science Development Forum", launched in 2007 and held annually, focuses on promoting the multidisciplinary integration of other disciplines with water science research. "Water Science Lectures", launched in 2021, is an open, shared and non-profit public welfare lecture. A report will be arranged for each lecture, lectured and presided by invited famous researchers. The Editorial Department of Water Journal cooperates with "China Water Forum", "Water Science Development Forum", and "Water Science Lectures" to set up a series of columns. We invite submissions in, but not limited to, the following topics: (1) Climate change and hydrology (2) Water problems and human–water relationship control (3) Water environment and ecology (4) Water information technology and modeling

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST
