

## Special Issue

# Water Economics and Water Distribution Management

### Message from the Guest Editor

Growing global scarcity of water, population growth, economic development, and climate change are factors forcing a change in the way water resources are managed. Moreover, the circular economy demands interdisciplinary research and discussion on these complex relationships. This Special Issue aims to take an in-depth look at “Water Economics and Water Distribution Management”, and invites publications on the following topics related to water management: alternative sources, energy efficiency, the effectiveness of wastewater treatment infrastructure, costs evaluation, leakage control, stormwater drainage, the risk management of natural disasters, wastewater disposal, hydrology modelling, urban planning, water law and good governance, environmental and social impact assessments, or circular economy approaches.

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
