

Special Issue

Erosion and Torrent Control

Message from the Guest Editor

This Special Issue will include papers referring to mountainous torrent hazards. The torrential phenomena that occur in many areas, such as landslides, debris, mud flow, erosion, and check dams could be examined, as well as their causes and mechanism. Additionally, appropriate torrent control against these phenomena could be examined.

Guest Editor

Prof. Dr. Panagiotis Stefanidis

Laboratory of Mountainous Water Management and Control, Faculty of Forestry and Natural Environment, Aristotle University of Thessaloniki, Thessaloniki, Greece

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
