

Special Issue

Ecology of Freshwater Fishes

Message from the Guest Editors

As fish is a key species group in freshwater ecosystem, it plays an important role in the healthy of aquatic ecosystem. The scope of this Special Issue includes all aspects of fish and others aquatic animals (crab, shrimps and crayfish) ecology in freshwater environments, including lakes, reservoirs, rivers, streams, ponds and marshes. Manuscripts involving but not limited to ecologically-oriented studies of behavior, conservation, feeding, genetics, life history, physiology, host-parasite interactions, and the function of fish to aquatic resource sustainable use and environment restoration are welcomed. Studies involving population ecology and community ecology are also of interest, as are evolutionary approaches including studies of population biology, evolutionary ecology, behavioral ecology, and historical ecology, conservation of endangered aquatic animals, the sustainable utilization of bio-resources in fishery. For further reading, please follow the link to the Special Issue Website at: https://www.mdpi.com/journal/water/special_issues/fishes_ecology

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
