

Special Issue

Flow and Transport in Fractured Porous Media

Message from the Guest Editors

Research on flow and transport in fractured porous media has attracted strong interest for many decades. This Special Issue aims to highlight the most recent advances in flow and transport in fractured porous media, from a theoretical or practical perspective. Original research and review articles on mathematical modeling, numerical simulation, and experimental and field studies are all welcome. For more information on the Special Issue, please visit:

https://www.mdpi.com/journal/water/special_issues/fractured_porous_media.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
