

## Special Issue

# Geochemical Barriers and Physicochemical Processes in Hydrosphere

### Message from the Guest Editor

We invite you to present your articles to the Special Issue of the peer-reviewed open-access journal *Water* (ISSN 2073-4441)—a leading journal on aquatic sciences, water management, and protection. The topic is “Geochemical Barriers and Physicochemical Processes in Hydrosphere”. The main aspects we plan to discuss in this issue are different conditions of the formation and development of geochemical barriers in aquatic and adjacent environments, physicochemical processes and thermodynamics of the migration and conditions of accumulation of substances in the environmental media, natural and technogenic barriers, and nature protection technologies, based on the knowledge of geochemical barriers.

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
