

## Special Issue

# Advances on Urban Stormwater Harvesting Strategies

### Message from the Guest Editors

This Special Issue aims to foster applied research on a diverse range of topics associated with urban rainwater/stormwater harvesting systems. Topics will include the technical design and performance of such systems, with specific references to strategies for water saving and reuse, quality aspects of rainwater, runoff control in urban catchments, urban agriculture/landscape, restoration of urban stream patterns and of healthy urban water cycle. Socio-economic aspects, as well as policies and strategies, aiming to promote system implementation will be included.

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
